Rebecca Finne

In my future job, I dream about being able to, in some way, make a difference. It could be anything to end poverty to an individual having an easier everyday life through any product that I have been a part of creating and developing. With my academical background, this will be possible for me, by together with a team develop a great product.

Education

Aug 2018 -   **MSc. Interaction Design and Technology**, Chalmers University of Technology, Göteborg

Aug 2015 – Jun 2018   **BSc. Software Engineering**, Chalmers University of Technology, Göteborg

Bachelor's Thesis: Better Together - An Android Application for Increased Physical Activity
The user does different workouts to earn points and every week compete against friends and family. I did different things in both back-end, front-end and UX, tools we used are the database Firebase, Sketch, and XML.

Work experience

Jun 2019 - Aug 2019   **Developer Intern,** Spotify
Working with Android Studio, I did bug fixes, tests and developed a feature on the Spotify Lite application. I had one-on-ones with my mentor which taught me tips and tricks on how to easily use the development tools like Android Studio and Github Enterprise.

Dec 2017 – Sep 2019   **Meeting leader**, Cultural Care Au Pair
Organizing information meetings for people who are interested in working as an au pair. I also do shorter interviews in English to evaluate the English level of the applicants and when the applicant is almost done with his or her application I do longer personal interviews to determine personality and maturity for example.

Jun 2017 – Aug 2017   **Summer job,** home service in Björkekärr
Helped old and sick with food, medicine, movement, and hygiene. This job made me learn to work and communicate with many different types of people, with for example handicap and trouble speaking.

Jun 2016 – Aug 2016   **Summer job,** home service in Arvika
Helped old and sick with food, medicine, movement, and hygiene. This job made me learn to work and communicate with many different types of people, with for example handicap and trouble speaking.

Jun 2014 – Jun 2015   **Au Pair** in the US, Cultural Care Au Pair
I traveled to the USA where I lived in a host family and took care go their child. During that year I have become more independent and more responsible. The child I took care of was very allergic so I had a great responsibility to make sure she did not eat anything she was allergic to and make sure her medication was close if something would happen.

May 2011 – May 2014   **Coworker** McDonald's, Charlottenberg
Worked in the kitchen and the checkout. In the checkout, I learned to give good service even in a situation where stress and the pressure were high. In the kitchen, I sometimes was the production leader, which meant I was responsible in the kitchen. I took special orders and made sure the others in the kitchen knew the orders and I decided what they should do.

Projects

May 2019	**Gbg Start-up hack 2019**, Göteborg Developed a meet-up organizer application called Ses. The application supports setting your status as available or busy and finding events close by. The application is developed in React Native and I was mostly responsible for the look and feel of the application.
Oct 2018	**Personal website** Made in html and CSS.
Feb 2018	**#MeToo Hack 2018**, Göteborg Developed an Android application called IMPACT. It contains tips on how to react and speak up in situations where sexual harassment has occurred. I worked with the front end in Java and XML.
Aug 2016 – Oct 2016	**Svenscan** Developed an Android application that would allow refugees to easier learn Swedish. Users could take pictures of a written word and a picture of the object and a voice that pronounced the word was playing. There was also a mini-game where a word was written out and the user chooses the picture representing the word. I worked mainly with the front end in Java and XML.
May 2016 – Jun 2016	**C.R.A.P - Chalmers run and play** A desktop application where the user plays as a character and where the main goal is to find by walking around on Chalmers campus and catch all the mascots by answering questions. I worked full-stack in Java.

Additional merits

Jul 2018 - Jun 2019	**Master Contact** in Software Engineering Student Union Board The board has overall responsibility for the student union, for example, make sure everyone is doing okay, the economics and demand student union meetings. My responsibility is to keep in contact with the master students and make sure the master programs are working.
Nov 2017 – Nov 2018	**Vice Chairman** in CESA, Computer Education in Southern Africa Voluntary work to help students in southern Africa get an education with computers. Started off by finding sponsors and computer donors. Then spent time with fixing and installing for example offline Wikipedia on the computers and shipping them off to South Africa. In August 2018 the board of CESA went to South Africa to hand out the computers to schools that need them and also fix old and broken computers.
Jan 2016 – Jan 2017	**Treasurer** for Student Committee at the Software Sngineering Student Union Planned together with 7 other students three-course dinner for 80-100 people with entertainment and nightclub events. My position was treasurer which meant I took care of budgets, bookkeeping and responsible for the checkouts during events. During the year I learned to work independently as well to work in a tight group where everyone had to agree.
Jan 2009 – May 2014	**Swim Coach** in Arvika swim team I was a swim coach between the years 2009-2014. I had by myself a group of children in the ages 7-12. I coached them once a week, thought them the basics in the four different strokes and had the responsibility during competitions.

Languages

Swedish - Native language
English - Very good skills in speech and writing
